WHO ARE SOLD SECURE?

Who we are

Sold Secure – an independent test & certification body dedicated to reducing the risk of theft by the assessment of security products.

History

Sold Secure was established in 1992 through the merger of two initiatives, Sold Secure and Partnership Against Car Theft (PACT), with the support of the Home Office. Its main objective was to address the widespread issue of car theft in the UK by independently testing and certifying aftermarket vehicle security products like steering wheel locks.

Initially facing decline due to improved vehicle security, Sold Secure was acquired by the Master Locksmiths Association in 1999. Under new ownership, the company underwent significant changes, developing comprehensive test specifications to cover all aspects of physical security. Sold Secure closely collaborates with the police to regularly update these specifications, ensuring they align with real-world theft techniques. Additionally, new test specifications are created to address emerging threats identified by law enforcement.

Today, Sold Secure operates from a purpose-built test facility located at the MLA's Head Office in Rugby, Warwickshire.

OUR GRADES

Third-party testing provides evidence of security and gives peace of mind about a product's security level.

Insurance companies often recommend using Sold Secure approved products, sometimes even insisting on their use.

Sold Secure testing is recognised by Secured by Design, an accreditation company from The National Police Chiefs Council.

The police, including Crime Prevention Officers, also recommend Sold Secure approved products.

Manufacturers and suppliers submit products for testing, and those that meet or exceed requirements display the Sold Secure logo. The tests are performed according to specifications developed with input from insurers, police forces, and industry organisations.

Sold Secure is independent and does not include manufacturers in the relevant parties. Testing is conducted by a team of specialist engineers who are either Master Locksmiths or experts in their field. They ensure consistency and simulate worst-case scenarios based on their extensive product knowledge and knowledge of attack methods. Sold Secure tests products based on their own specifications as well as British and European Standards.

SS301 Domestic Buildings Gold

You are looking for our highest level of security for domestic buildings.

A comprehensive attack test, utilising heavier duty tools for a prolonged period of time, protecting against the most dedicated thieves.

SS301 Domestic Buildings Silver

You require a higher level, offering enhanced security.

A significant attack test, demonstrating a high level of protection against well-equipped, more determined thieves.

SS301 Domestic Buildings Bronze

You intend to upgrade your existing hardware to serious security products.

A benchmark in domestic building security, providing a good level of protection against the determined thief, as well as the opportunist. This grade is the minimum requirement for handles and escutcheons to comply with building regulations (PAS24), when coupled with an SS312 Gold lock cylinder.

Sold Secure Key Safes Gold

You have a door & lock that provides the highest security, and need a key safe of the same protection level.

An enhanced level, with a comprehensive attack test, to protect against dedicated, significantly well-equipped attacks, for an extended time.

Sold Secure Key Safes Silver

You are looking for a key safe that offers resistance to a more determined attack.

A serious attack test to deter the more determined, better equipped thief.

Sold Secure Key Safes Bronze

You require a key safe that offers at least a base level of attack resistance.

An entry-level attack, providing real protection from the opportunist thief.
